A2SP B.V. Ready for the Future with SaM Solutions

A2SP B.V., a leading IT services company for automotive sector, chooses SaM Solutions B.V. as its software development partner for a range of its projects. To secure high quality and timely delivery of its software, A2SP opted for Agile Scrum as its mainstream development methodology. After demonstrating vast experience with Agile methods and successfully delivering a pilot project, SaM was awarded a full service contract for A2SP consumer portal web-development.

A2SP and SaM are now putting their efforts together to launch a new version of an online booking system www.autoafspraak.nl, offering consumers a possibility to book appointments for vehicle inspection and services online. Technical and functional teams in Utrecht and Dnepropetrovsk effectively work together, proving that distributed Scrum is possible. Technologically the project is built on PHP/MySQL/AJAX with special emphasis on high performance, superior user experience and solution scalability.

"High competence in Agile Scrum, proven technical expertise and business stability was the rationale behind choosing SaM Solutions as our preferred supplier. SaM is definitely a trustworthy and reliable partner and we are very pleased with the quality and overall progress of our collaboration", - says Jasper Steffens, Managing Director of A2SP B.V.

About A2SP B.V.

A2SP (www.a2sp.nl) is an entrepreneurial B2B supplier and a value-added reseller of automotive-related data, statistics and services for the automotive, insurance and financial companies. A2SP offers vehicle information database services for the full Dutch vehicle market. These services are further extended by A2SP offering additional commercial and technical information.
