## SaM Solutions renews its Gold competency in the Microsoft Partner Network

SaM Solutions, one of the leading offshore/nearshore companies on the Belarusian market, was among the first to gain a Gold competency in the renewed Microsoft Partner Network.

The renewed Microsoft Partner Network was made available on November 1, 2010. Unlike its previous version, the new program offers clearer differentiation by competencies and involvement levels. An involvement level (status) is directly linked to a specific competency reflecting the type of a partner's business or profile in relation to Microsoft solutions and technologies. Apart from this, the new program has considerably higher requirements for Gold partners.

To gain the Gold competency in Web Development, SaM Solutions met a number of updated requirements related to employee certification and customer feedback. This competency demonstrates the ability of the company to deploy complex online solutions that allow our clients to run their businesses more efficiently.

The renewal of the Gold competency in the MPN program confirms the company's compliance with the increased requirements of the new partner program, which would not happen if it hadn't been for the professionalism of its employees and positive feedback submitted by its clients.

### About Microsoft Partner Network (MPN)

Microsoft Partner Network is a new version of Microsoft's partnership program, a community where Microsoft partners can fully utilize their potential. Partners of the new program get access to a huge pool of various resources, including software, training courses and technical support services. A competency earned in Microsoft's partner program allows partner companies to demonstrate their skills and expertise to potential clients easier and more efficiently.

### About SaM Solutions

SaM Solutions is one of the leaders of the IT outsourcing and software development market. 18 years of experience, a broad range of competencies and a DIN EN ISO 9001:2008 certified quality control system enable the company to develop solutions of any complexity that meet customers' expectations and use the latest software development technologies.

SaM Solutions has worked for such major internationals as Siemens, Fujitsu and SAP, public organizations, such as the European Patent Office, and mid-sized companies, such as Lexware or azh GmbH.

To date, SaM Solutions has a global pool of over 600 employees in its Germany-based headquarters and offices located in the US, Eastern and Western Europe.
