SaM Solutions Ranked as one of the World's Largest Software Companies

SaM Solutions, a leading outsourcing software development company, today announced its inclusion on the Software Magazine's 27th annual Software 500 ranking of the world's largest software and service providers. The company focuses primarily on IT consulting and offshore programming services.

SaM Solutions was ranked 357, which is a rather good sign for the company, taking into account its first-time participation in the ranking.

The ranking is based on total worldwide software and services revenue for 2008. This includes revenues from software licenses, maintenance and support, training and software-related services and consulting.

"The 2009 Software 500 results show that revenue growth in the software and services industry was healthy, with total Software 500 revenue of \$491.3 billion worldwide for 2008 representing 8.8%

growth from the previous year," says John P. Desmond, editor of Software Magazine and Softwaremag.com. "The Software 500 helps CIOs, senior IT managers and IT staff research and create the short list of business partners," Desmond says. "It is a quick reference of vendor viability."

"Being listed in the Software 500 ranking means first of all recognition of SaM Solutions as one of the prominent software services providers in the world," commented Anton Dechko, Director of Business Development, SaM Solutions GmbH. "It's an important achievement for our company and it demonstrates our commitment to constant improvement and development of our business".

About Software 500

The Software 500 is a revenue-based ranking of the world's largest software and services suppliers targeting medium to large enterprises, their IT professionals, software developers and business managers involved in software and services purchasing. Some 44 percent of the 2009 Software 500 companies are privately held.

About Digital Software Magazine, the Software Decision Journal, and Softwaremag.com

Digital Software Magazine, the Software Decision Journal, has been a brand name in the high-tech industry for 30 years. Softwaremag.com, its Web counterpart, is the online catalog to enterprise software and the home of the Software 500 ranking of the world's largest software and services companies. Software Magazine and Softwaremag.com are owned and operated by King Content Co.
